

## DRUG ABUSE BY STUDENTS

The teachers, coaches, administrators and the school board are truly concerned with the student's overall growth and development. Chemical dependency is recognized as a treatable disease which may interfere with the learning process, create severe interpersonal problems, and cause physical and emotional suffering to the user as well as to family and close associates. The Bath school system will cooperate with effective organizations to help detect, diagnose, and treat affected students. The board unequivocally believes that the schools should be free from the detrimental effects of illicit drugs and alcohol.

In order to ensure the highest possible standards of learning, as well as the safety, health and well-being of students, the school board endorses a substance abuse policy which will aid students to abstain from the use of drugs and alcohol, provide for early intervention when use is detected, corrective disciplinary sanctions when necessary, and aftercare support as appropriate. Compliance with each school's standards of conduct related to substance abuse is mandatory.

### Prevention

The school system will provide students with information and activities focused on prevention of the use of alcohol and drugs. Programs are to be provided that teach students that using illicit drugs and alcohol is wrong and harmful. The legal, social, and health consequences of drug and alcohol abuse are to be addressed. Students are to be taught how to resist peer pressure.

### Intervention

The school system will establish and provide assistance, through a team approach, to intervene with students who are chemically involved. Students are to be assisted in addressing their harmful involvements with chemicals and in continuing in their educational programs. Moreover, information and referral shall be provided, as appropriate, to aid involved students in connecting with community agencies for drug and alcohol use treatment.

### Rules and Sanctions
